

System Requirements

Customer Priority Legend

1 – Base Functionality Must Have

These items must be implemented for the most basic of functions to be accessible. In most cases this will only include the ability to Create, Answer, Join, Broadcast, and View polls. The topic Create involves the ability to create a Rank, Multiple Choice, or Schedule type poll. The topic Join involves the ability to join an existing poll. The topic Broadcast involves the ability to broadcast the poll to the party. The topic View involves the ability to view the poll's result.

2 – Base Functionality Should Have

These items represent secondary functions that most affect the capability and use of the poll. These Requirements most often include the ability to Customize polls

3 – Base Functionality Support and Customer Should Have

These items include one primary form of functionality. That is, these include requirements whose sole purpose is to support those secondary requirements.

4 – Customer Nice to Have

These items represent customer requests which were labeled as 'Nice to Have'. These requirements include such things as allow a user to perform finger gestures, allow a user to respond to a poll with a custom response, allow a user to view who responded what.

5 – Project Team Nice to Have

These items represent Poll additions which the project team felt would add to the overall usability of the Product.

SR01 Create Poll

Project Priority: 1

The system shall allow all Users to be able to create a Poll. One who creates a poll shall be named "Admin"

Status: Not Implemented.

UC 1

SR02 Choose Question Type

Project Priority: 1

The system shall allow the Admin to be able to choose a question type (MC, Rank, Schedule Integration).

Status: Not Implemented.

UC 2

SR03 Join Poll

Project Priority: 1

The system shall allow all Responders to be able to join a poll with a temporary access code.

Status: Not Implemented.

UC 3

SR04 View Home Screen

Project Priority: 1

The system shall allow the Users to be able to view the home screen.

Status: Not Implemented.

UC 4

SR05 Create Multiple Choice

Project Priority: 1

The system shall allow all Users to be able to create a Multiple Choice Question.

Status: Not Implemented.

UC 5

SR06 Configure Multiple Choice Question

Project Priority: 2

The system shall allow the Admin of a poll to be able to configure a Multiple Choice Question with two settings, Multiple Responses and Custom Responses.

Status: Not Implemented.

UC 6

SR07 Create Rank

Project Priority: 1

The system shall allow all Admins to be able to create a Rank Question.

Status: Not Implemented.

UC 7

SR08 Configure Rank Question -- ON HOLD

Project Priority: 2

The system shall allow the Admin to be able to configure a Rank Poll.

Status: Not Implemented.

UC 8

SR09 Create Schedule Question

Project Priority: 2

The system shall allow an Admin to be able to create a Schedule Question.

Status: Not Implemented.

UC 9

SR10 Configure Schedule Question -- ON HOLD

Project Priority: 3

The system shall allow the Admin to be able to configure a Schedule Question.

Status: Not Implemented.

UC 10

SR11 View Group's Polls

Project Priority: 2

The system shall allow all Users to be able to view their Group's Polls.

Status: Not Implemented.

UC 11

SR12 Vote on MC Question

Project Priority: 1

The system shall allow all Responders within an MC poll to be able to vote on a Multiple Choice Question.

Status: Not Implemented.

UC 12

SR13 View poll results

Project Priority: 1

The system shall allow all responders to be able to view the results of their polls.

Status: Not Implemented.

UC 13

SR14 Broadcast Toggle

Project Priority: 1

The system shall allow Users who have joined a polled can broadcast an access code for other users to join. Upon broadcasting, the user is labeled 'Admin'

Status: Not Implemented.

UC 14

SR15 Import Calendar

Project Priority: 4

The system shall allow all Responders to be able to integrate their calendar into schedule poll responses

Status: Not Implemented.

UC 15

SR16 Vote on Rank Question

Project Priority: 1

The system shall allow all Responders within a poll to be able to vote on a Rank Question

Status: Not Implemented.

UC 16

SR17 Vote on Schedule Question

Project Priority: 2

The system shall allow all Users within a poll to be able to vote on a Schedule Question

Status: Not Implemented.

UC 17

SR18 Add Calendar Event

Project Priority: 5

After schedule polls have been decided the system shall allow a responder to choose to add the selected time to their calendar

Status: Not Implemented.

UC 18

SR19 Import User Settings

Project Priority: 4

The system shall allow responders to be able to automatically import their name and an avatar from a google/iOS account on their phone

Status: Not Implemented.

UC 19

SR20 Modify User Settings

Project Priority: 3

The system shall allow all Users to be able to alter their display name and avatar that gets displayed to others when they voted in a poll

Status: Not Implemented.

UC 20
