Requirements:

1. Android Device running with a minimum API of 14.
2. Internet Connection.

How to Install:

1. Download APK file from csesoftwaretools artifact upload under “Project README file”
2. Make sure “Install apps from unknown sources” is enabled in the settings menu, specifically from the Android Security Settings.
3. Run the APK file from the downloads folder and install it.
4. Or download from GitHub repository at URL: <http://XXXXXXXXXXXXXXXXXX>

How to Run:

1. Navigate to “Apps” list on Android Device.
2. Run “Punctual”.

Test Account Credentials:

Username	E-mail	Password	Usage
awsmtest	awsmtest@test.com	awsmtest	TCBF1, TCBF3
test	test@test.com	test	TCBF1
test2	test2@test.com	test2	TCBF1
test3	test3@test.com	test3	TCBF2
testme	amistermetoo@yahoo.com	testme -> testme2	TCBF4
testme2	awsmtest@yahoo.com	testme2 -> testme	TCBF4

E-mail Accounts To Reset Password [TCBF4]:

Gmail credentials:

1. E-mail - amistermetoo@gmail.com
2. Password - weareawsm

Yahoo credentials:

1. E-mail - awsmtest@yahoo.com
2. Password - wearesoawesome

Restart Application (In case of crashes):

1. Close/Stop the running application from multitasking window (Method varies across Android devices)
2. Rerun “Punctual” application.

For Sign Up Test Case [TCBF1]:

1. After executing the Workflow and verifying the test passes, please close and restart application. Upon restarting application, you shall be redirected to the “Home” screen. Then click the upper left menu icon and click “Logout”. This allows you to test the other tests.

Known Issues:

1. My Planet screen or Home screen may crash at times due to an out of memory error regarding the use of bitmaps. When this happens, please close the app and restart it.
2. Sometimes the Arrival Button may not appear right away after adding a new Quest that has a start time within 10 minutes after the current time. In these cases please refresh the Home page clicking Home from the menu bar. If the Arrival Button still doesn't appear, please close and restart the app. As a last resort, please delete the Quest and try again by recreating it.

Notes:

1. For convenience, the Use Case and Requirements Documents are hyperlinked.
2. User Stories are within the Acceptance Tests documents.
