

# USER STORIES

# GLOSSARY OF TERMS

<b>Account</b>	An email & password pair.
<b>Emergency</b>	The conventional meaning: Any event requiring medical attention.
<b>Friends</b>	Other users of the app that have explicitly confirmed a friend request.
<b>Invitation</b>	A timed pop-up prompt with confirm and decline buttons.
<b>Journey</b>	A manually-started process that maintains location tracking, allows the user to capture <b>moments</b> , and can be saved as a <b>memory</b> .
<b>Meeting Point</b>	A pin on the journey map that all <b>squad</b> members may create, see, remove, and get direction to via the google maps API.
<b>Memory</b>	A <b>journey</b> saved in storage - linked to the user's account - that can have <b>moments</b> hidden or shown, and can be shared with <b>friends</b> .
<b>Moment</b>	A captioned photo or a short video clip taken by the user, embedded at the location and time of its inception in the user's <b>journey</b> .
<b>Profile</b>	An overlay - accessible by <b>friends</b> - that displays the user's name and (optionally) the user's home address and <b>memories</b> , and provides the ability to remove from <b>friends</b> and <b>invite</b> to <b>squad</b> .
<b>Settings</b>	Account information and app customization options.
<b>Squad</b>	A temporary collection of friends that provides a chat overlay, emergency alert functionality, allows members to see each other's live locations, and shares <b>moments</b> between all members' journeys. Squads can be joined and left without ending a user's <b>journey</b> .
<b>Status</b>	A small, colored icon beside a friend's name that is grey if the user is offline, green if they are online, blue if they are in your own squad, and flashing red if they sent out an alert

**Cluster**

A cluster of google marker pins which are shown as a circle with a numerical value indicating how many pins are in the cluster.

**Pin**

A google marker pin which holds an image if clicked on.
